Smart Fingerprint Padlock

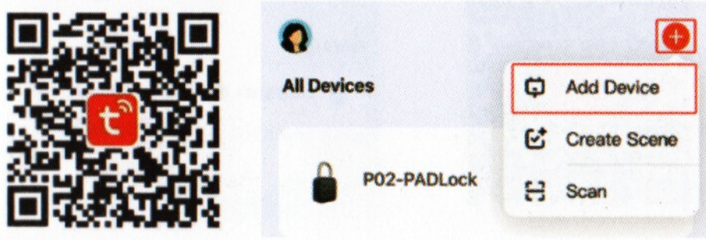
Operation Method Guide

First, tear off the plastic film on the back of the lock, and the product will start to be powered on and operate.
The default setting of the lock allows it to be unlocked with any fingerprint. When it is unlocked, the blue indicator light will turn on, which indicates that no fingerprints have been added to the memory of the fingerprint lock yet.
You must register new fingerprints to exit the default mode. This smart fingerprint lock can store up to 10 fingerprints in its memory. Once the fingerprints are successfully registered, when unlocking with a registered fingerprint, the green indicator light will turn on.

*1.**Download the "Tuya Smart" App***
Scan the QR code below to download the "Tuya Smart" app.

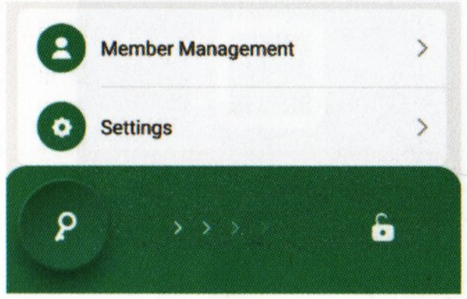
*2.**Enable Bluetooth on Your Phone***
Open the app and log in. To grant the app access to Bluetooth, go to "Me", then tap the "Settings" icon in the top-right corner, and select "Privacy Settings".

*3.**Wake Up the Padlock***
Press the "Fingerprint Recognition Area" on the padlock to wake it up. Then, click "Add Device" to add your padlock to the app.

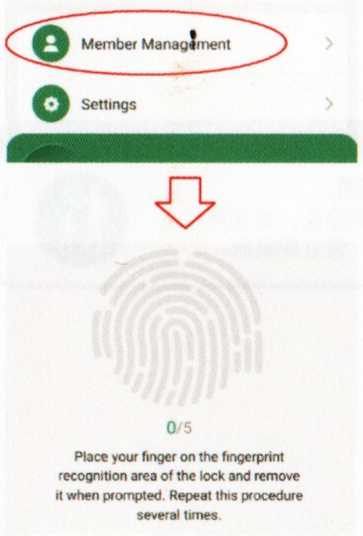


Product Specifications:
Unlocking Method: Fingerprint Identification/Tuya Smart APP Platform Management
Fingerprint Capacity: Capable of storing 10 fingerprints
Waterproof rating: IP67
Standby Time: Up to 6 months
Low Battery Indication: The red light flashes for 5 secondsafter unlocking
Battery Type: Two coin cell batteries CR2032
Operating Temperature Range: From -10 °C to 45 °C
Product Material: Zinc alloy + ABS face cover + Stainlesssteel lock hook

4.Unlock the Smart Padlock
On the main page of the smart padlock app, unlock the padlock by sliding the Key icon at the bottom from left to right until it reaches the Lock icon. Attention: If the Bluetooth connection is lost, place your finger on the fingerprint area to wake up the smart padlock. Then, tap "Tap to connect

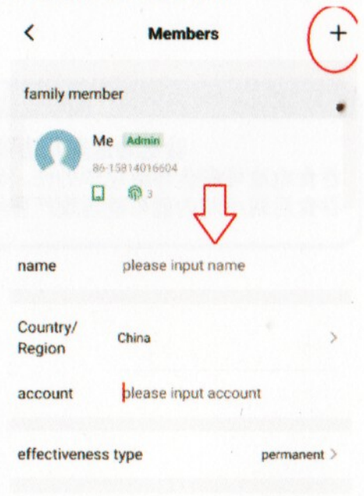


5.Add Fingerprint
To add a fingerprint, please click on "Member Management" and then select "Me". Follow the prompts in the application, press your finger on the fingerprint reading area multiple times to complete the fingerprint registration.



Member Management
Settings
0/5
Place your finger on the fingerprint recognition area of the lock and remove it when prompted. Repeat this procedure several times.

6.Share Unlock Permissions
To set up the temporary unlocking sharing function, please click on "Member Management", and then click the "+" icon in the upper right corner. Click on "Share Member" to share the unlocking permission with visitors.
***Attention:** Please ensure that the visitor's account has been registered in the Tuya application, and the account information is accurate and correct.*

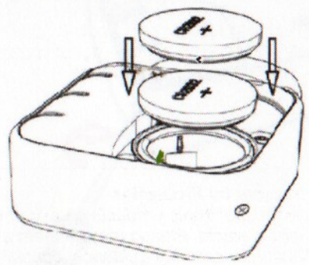


Troubleshooting
If the green light flashes when you press your fingerprint but the lock still can't be opened, please first try replacing the batteries with brand-new ones. Pay attention to the positive and negative poles of the batteries. When installed correctly, the red light won't flash continuously when you press your fingerprint. If the red light flashes instead of the green light when you press your fingerprint, please connect to the lock via the APP, delete all the saved fingerprints, re-register the fingerprints, and then continue using the lock.

OPERATION

Use a screwdriver to turn counterclockwise, remove the screws, and then open the battery cover.

Place the button cell batteries in anode face up and cathode face down. Then replace the battery cover.



Note: Removing the batteries will not delete the saved fingerprints in the padlocks memory.

BATTERY DISPOSAL

CAUTION:Battery Safety and Disposal

Dispose of used batteries immediately. Keep new and used batteries away from children. If you suspect a battery has been swallowed or inserted into any part of the body, seek medical attention immediately. If the battery compartment cannot be securely closed, stop using the product and keep it away from children.

This product contains a battery and should not be treated as regular household waste. It must be recycled. Please take it to the nearest recycling facility or contact your local government for more information. Batteries contain substances that may be harmful to the environment and human health. Keep them out of reach of children. If accidentally swallowed, seek medical attention immediately.

⚠ Battery Warning!

Keep batteries out of reach of children.
Ingestion may cause chemical burns, soft tissue perforation, and death. Severe burns can occur within 2 hours of ingestion. Seek medical attention immediately.

Environmental Protection
Discarded electronic products should not be thrown away with household waste. Please recycle them at designated recycling facilities. For recycling guidance, consult your local government or retailers.
